Tips for Lexia

Your student may be spending more time than usual on Lexia due to remote learning. Here are some tips to keep it fun, engaging, and productive!

You and your student can learn fun facts by clicking on the different animals on the main page of each level.

You can talk about what continent your student is on when they get to the welcome screen map, or discuss the country/environment where their level is set.

Make note of new or tricky vocabulary words you encounter. Review these words at the end and in future sessions.

Use the “Annotate” feature in Zoom to offer your student visual praise and encouragement, like a stamp.

Watch out for the “frustration apple” to turn red.

Encourage students to replay the directions or word/question as needed.
