Spider Man Comes to The Cities Aide Once Again

by Terence Haung

Spider man is a superhero because he can make webs from his hand and because he saves people, he got these powers from a radioactive spider his uncle died to a burglar and before his uncle died, he always tells Peter great power equals great responsibility.

Who is Spider man?
Spider man is when not being a superhero Peter Parker he has an aunt and uncle named aunt May and Uncle Ben but both his aunt and uncle both died.

Spider man's enemy's
Spider man has many enemy's (most of them are villains). His number one villain is venom who can also shoot webs and climb buildings except he is evil and wear black (which is not clothes its alien body which is because an alien came down from space found a person who did not like spider man and the man is now able to use the aliens' powers one of which is to make any weapon from the alien's body). Another one-off spiders' enemy is rhino which is a super big man who has tough armor with a horn on the top and can destroy stuff easily. I am only going to say three of spider man's enemies since there is a lot of them so the last one is kingpin big but not as big as rhino and not as strong but strong enough to break walls plus he is smarter than rhino at lest and he hates spider man.

The Snow Tubing Accident

by Noemi Ferreira

A girl named Olivia went down the mountain. She was the last row that was new to the woods. The tube slipped and Olivia went down into the forest. No one saw her slip because the staff was trying to control the line and the people were talking loudly and yelling and having so much fun that they did not even notice her falling.

How the person was found
Finally, when the people were gone, they told everyone to be in a line and the staff will say their name and will say present but when Olivia's name was called there was no response. They went to find her. After 3 days of nonstop looking, they found her. She was in an abandoned house and cold and hungry and she had a broken arm. Her head was fine because she had a helmet. If not for the helmet she would have had a head injury and a bad memory loss. They brought her to the hospital to check everything out. They gave her exercises to strengthen her arm. She got better and was good.

How to Save the World

The latest local news

by Ruth Ferreira

How to save the world because people do not recycle animals that live in danger to save the turtle. People should not throw your plastic straw in the ocean because they get stuck in turtle noses. How can you help? You should order metal straws, and a metal water bottle, and
you might save the world.

Turtles will suffer with unwanted plastics

Turtles must survive

Breaking News!!!

Amayah Smith

Two dangerous criminals have broken out of their prison cells. The police have been trying to find them, and they have not found them yet. If you see two people in black coats, make sure to run away.

Advice
To stay safe stay inside and lock your door. Be aware of your surroundings, and If you see them call 911.

Criminal Description
We do not know what they look like so make sure to protect yourself. They were last seen wearing black coats. One is tall and the other is short, and they have been dressing up as normal people in the day.

Masks are a must to fight the pandemic

COVID - 19 School Resolution.

By Omar Dweck

COVID - 19 has affected everybody in a significant way. Most of the kids have virtual school or no school. This problem has easily affected schools. With the new vaccines coming out that might change soon, the school might be able to open again. If the pandemic ends, students will be able to enjoy lunch again after the pandemic.

How has it affected schools so far?
A lot of teachers have caught Covid, and they are still at risk of catching it again. Even if the faculty is fully vaccinated, there is still a chance they can contract COVID - 19. Students now have 5–10-minute small mask breaks, and students need to take a specific path to get to their classrooms.

How is the vaccine going to change the world?
The vaccine is not accessible to the youth, but it can save us from the pandemic in the future when it is accessible to the youth. Some students may feel the vaccine is ineffective and would not take the vaccine. If there is herd immunity, the rest of the students who are not vaccinated will remain safe. If the vaccine is amazingly effective, we would not have to wear a mask after the vaccine is accessible to everyone.

Big Birthday Bash!

Dominique Casey

There is a bouncy house that the girls can play on. They will have a popcorn machine and an Ice cream machine. They have face painting, and a spa where the girls can go on a spa date.

Decorating
The parents put up colorful balloons to decorate the party.
They ordered photo booths and it came just in time for the girls to take pictures. They put colorful Tablecloths on the table, so the kids will not mess up the table. They have a lot of delicious Pastries like cookies and cake!

Planning
It is a Surprise 9th birthday party for my little girl's birthday party. The surprise is a trip to Disneyland with a surprise birthday party with mickey and mini mouse. Megan The Stallion and Cardi B will be there will also be there.

There will be a lot of music to listen to with her friends, and the music will be Cardi B and Megan The Stallion.

Covid Vaccines

Covid has changed a lot of people's lives. Many have died but now scientists around the world have made a vaccine. Many older People have taken it and their lives have changed back to the way they were, and they can do anything they want. Like people can visit them now and they can go anywhere and only some places they must wear masks. Nowadays people with jobs in general get vaccinated soon. So, the younger people will get vaccinated soon. People that did not get vaccinated and if they are in a herd of people with the vaccine, they will not have a high chance of getting covid 19.
